Calathea rufibarba

CALATHEA WAVESTAR

CATHEDRAL PLANT, PEACOCK PLANT, PRAYER PLANT

CALATHEA WAVESTAR

Originates from tropical regions in South America and features striking green and burgundy-purple foliage with curvy, undulating edges. This jungle floor-loving species opens its leaves during the day and folds them together as light decreases, hence the "Prayer plant" moniker.

TEMPERAMENT: Relatively easy to grow with the right light and water conditions.

LIGHT: Bright. Calathea likes bright, indirect light or partial shade and thrives in humidity. Keep in a sunny room out of direct sunlight. Regularly misting recommended.

WATER: Likes to be kept moist but not soaking wet. Water every few days or as soon as surface soil is dry with distilled or purified water.

PET FRIENDLY: Yes

AIR CLEANING: Tirelessly, day and night.

SIGNS OF DISTRESS:

Curly, crispy leaves

This moisture loving plant wants more water!

Spots on leaves

Calathea can be sensitive to minerals in tap water so use distilled water.
